

## INTERSPAR Bregenz

Kulmus Bügelmayer GmbH, 2020

The INTERSPAR hypermarket in Bregenz on Heldendankstraße is equipped with Fural baffles. Above the entrance and the checkout area, there is an oval opening in the ceiling that creates space for the Fural baffles. These harmonize perfectly with the closed ceiling and cleverly conceal fixtures in the ceiling cavity - such as lights placed between the baffles. The baffle rows themselves are suspended in an offset manner, creating aesthetically pleasing accents. The reflection of the logo light provides additional color accents on the baffles, which are finished in RAL 4201.
